Certifications

Machine Learning Introduction for Everyone (Endorsed by PwC's Data Risk and Privacy Group)

Experience

Senior Associate, Data Risk and Privacy Group | PwC - Detroit, MI (2023 - Present)
- Applied advanced analytics and automation tools, including AI platforms like Relativity, to identify and classify sensitive data such as Personally Identifiable Information (PII).
- Supported the structuring of unstructured datasets to improve triage processes and enhance data security assessments.
- Partnered with multinational clients in tech and financial services to design and implement robust data governance frameworks.
- Ensured compliance with global privacy regulations through tailored risk management strategies.

Experienced Associate | PwC - Detroit, MI (2022 - 2023)
- Led detailed risk assessments for Fortune 100 clients, identifying vulnerabilities and recommending mitigation strategies.
- Collaborated with executive leadership to align data privacy initiatives with business objectives.
- Provided analytics support and process improvements for compliance reporting.

Student Researcher | University of Michigan - Ann Arbor, MI (2018)
- Conducted biological research on mRNA-induced gene expression in monarch butterflies.
- Developed analytical and problem-solving skills applicable to current work in data and technology.

Education

Kalamazoo College - Biology, Environmental Studies (2015 - 2019)

Objective

I aim to leverage my expertise in data risk management, governance, and analytics - with additional experience in machine learning applications - to contribute to innovative, data-driven solutions. My goal is to continue building scalable systems that improve security, compliance, and operational efficiency.

Grant Lobert
